

UNDERSTANDING PRIMARY TRENDS

Australia

There are primary trends, intermediate trends, linear trends, exponential trends, rising trends and falling trends. This talk is about understanding the significance of all these different trends and why primary trends are the most important. Alan Hull will show you how to identify both primary and intermediate price trends and how to use technical analysis to optimize your market entry. Alan will also demonstrate the dangers of exponential trends and why longer term investors should avoid them.

Guest Presenters

ALAN HULL

Stockmarket expert, presenter + best selling author

Alan is one of Australia's leading Stockmarket experts

He is an internationally published author, presenter and creator of the Hull Moving Average which is available in nearly every charting program throughout the world.
