

WHY SUSTAINABLE
TECHNOLOGIES
ARE LIKELY TO
TAKE A STEP
FORWARD
THROUGH THE
CURRENT CRISIS”.

Global stimulus packages such as the European Green Deal will have a significant impact on sustainable technology and environmental equities in a post COVID world.

Join Nanuk’s Dan Powell, to discuss the reasons why sustainable technologies are likely to take a step forward through the current crisis.

Guest Presenters

DAN POWELL

Head of Distribution, Nanuk

Dan joined Nanuk in 2017 and is the firm’s head of distribution with over 30 years’ investment industry experience. He is an experienced distribution professional in financial services across retail and institutional markets, covering sales, marketing, strategy, product development and web-based services in investment management, employer super, life insurance, platforms and investment advisors. Previously, he was employed with Bankers Trust Financial Services for 12 years in senior distribution roles for their investment management, platform and private client businesses and has also held leadership sales and marketing roles with ING Australia and AMP. Dan holds a degree in Business Marketing, Finance & Economics from Curtin University.
